Certificate Course in Web Design
Certificate Course in Front-End Web Development

Kekirawa English Academy - English Course

G.C.E. Advanced Level - Commerce | Results: 1 B, 2 C

SELECTED ACADEMIC PROJECTS

Nethma Samadhi | Software, web and data-driven applications

FinAI - AI-Powered Financial Intelligence System

React, Vite, Python, FastAPI, SQLite, Scikit-learn, EasyOCR, Browser Speech API

- Designed and developed a full-stack financial application integrating React and FastAPI through REST APIs and JSON.
- Built transaction creation, viewing, editing and deletion with SQLite persistence, input validation and duplicate detection.
- Developed interactive spending dashboards, transaction history and AI-generated financial insights.
- Implemented budget and transaction-amount prediction and behavioral fraud detection; compared machine-learning models.
- Integrated receipt extraction and voice expense entry, including user review before saving.
- Evaluated models with R-squared, MAE, RMSE, precision, recall and F1-score.

Ayurvedic Medicine Management System

PHP, MySQL

- Developed frontend, backend and database-backed inventory and order management functionality.
- Created tracking, reporting and dashboard features for medicines, orders and related records.

Library Management Website

HTML, CSS, JavaScript, PHP

- Developed frontend and backend features for book cataloguing and member management.
- Implemented user-facing forms and library workflows; tested form interactions during development.

Cleaning Service Mobile App

Android Studio

- Built registration, service-booking and appointment-scheduling workflows.
- Developed user-facing screens and tested forms and application interactions.

RELEVANT EXPERIENCE ACROSS DISCIPLINES

Software & web: Full-stack features, frontend/backend integration, REST APIs, relational databases and version control.

Quality: Form and interaction testing, transaction validation and duplicate checks in FinAI.

Analysis: Financial dashboards, predictive models, inventory reporting and website analytics exposure.

Digital operations: WordPress content workflows, on-page SEO, redirects, image alt text and analytics/tagging tools.
